Objectives

I am a passionate and results-driven backend developer with expertise in building scalable, secure web applications using PHP (Laravel). Skilled in server-side architecture, RESTful APIs, and database management with MySQL and PostgreSQL. Experienced in developing dynamic admin dashboards and performance-optimized systems. Committed to delivering clean, maintainable code and collaborating across teams to deliver high-quality software solutions.

Skills

- ✓ Database: MySQL, PostgreSQ.
- ✓ Version Control: Git, GitHub, CI/CD.
- ✓ Languages: PHP 7+/8+, JavaScript.
- ✓ Framework: Laravel, CodeIgniter, Node.Js

Experience

FULLSTACK DEVELOPER   June – August 2025

MotoDoc – *(Professional Automotive Service Platform)*   www.motodoc.app

MotoDoc is an automotive service management marketplace connecting car owners with verified mechanics for maintenance, repair, and emergency services. The platform offers vehicle management, service booking, transparent pricing, and keeps maintenance records to simplify auto care for both owners and service providers.

FULLSTACK DEVELOPER   April – June 2025

IRE Community – *(Landowner & Project Management Platform)*   www.irecomm.com.ng

IRE Community is a platform designed to streamline real estate ownership, land contribution, and project funding in rural communities. It enables community members to register land, join funded projects, and track financial activities with full administrative control.

FULLSTACK DEVELOPER   May – July 2025

SVS – *(School Voting System Platform)*   svs.intelliccloud.site

SVS is an online voting system used by university associations to conduct transparent, secure, and paperless elections among members. It supports voter registration, candidate nomination, vote casting, real-time result, and ensures only eligible members vote exactly once.

FULLSTACK DEVELOPER   May – June 2025

KPoint Savings – *(Digital Contribution Service)*   www.kpointsavings.com

KPoint Savings is a digital savings and cooperative platform built for users, group reps, and admins to manage contribution plans, digital wallets, and automated savings. The system supports multi-role access and facilitates seamless savings cycles and withdrawals.

BACKEND DEVELOPER   April – July 2025

UZEL Fintech – *(Multi-currency & digital finance platform)*   www.uzelpay.com

UZEL Fintech is a secure financial platform that supports multi-currency wallets, user onboarding with KYC, and two-factor authentication. It offers modern financial services including token-based access, user account protection, and real-time activity tracking.

FULLSTACK DEVELOPER   December 2024 – March 2025

TribePeer – *(Peer-to-peer learning platform)*   www.tribepeer.com

TribePeer is a social learning platform where users can create or join learning tribes. It features a subscription system, messaging between users, and tutor dashboards for content sharing and performance tracking. It encourages collaborative learning and peer engagement.

BACKEND DEVELOPER   February – April 2024

Potential College – *(School Management site)*   www.potential.com.ng

Potential College is an academic management platform that provides tools for schools to manage students, staff, courses, and records. The platform supports administrative access, course content publishing, and internal communication.

BACKEND DEVELOPER/TUTOR   January – September 2024

Intellic Solutions – *(Tech Solutions Service Provider)*   www.intellicsolutions.org

Intellic Solutions is a corporate technology services company offering web applications, mobile solutions, and digital marketing services. The backend system is responsible for handling client requests, managing content and portfolios, user authentication, and secure data interactions in a service-oriented environment.
