

# OWOSENI KAYODE ABDULKAREEM

## Backend Software Engineer

PHP (Laravel) | Node.js | API & Systems Development

Lagos, Nigeria · [+234 901 333 2285](tel:+2349013332285) · [kayode.owoseni123@gmail.com](mailto:kayode.owoseni123@gmail.com)

Portfolio: [devkraft.intellicloud.site](http://devkraft.intellicloud.site) · GitHub: [github.com/malkayne](https://github.com/malkayne) · LinkedIn: [linkedin.com/in/kayode-owoseni](https://linkedin.com/in/kayode-owoseni)

### Professional Summary

Backend Software Engineer with experience building scalable, secure systems across fintech, SaaS, and multi-user platforms. Skilled in PHP (Laravel), RESTful APIs, database design, and system architecture, with working knowledge of Node.js. Proven ability to develop and maintain production-grade applications, optimize performance, and implement reliable backend workflows. Passionate about building efficient systems and continuously adapting to modern technologies.

### Technical Skills

- ✓ **Languages & Frameworks:** PHP (7+/8+), Laravel, JavaScript, Node.js
- ✓ **Databases & Storage:** MySQL, PostgreSQL, MongoDB
- ✓ **DevOps & Tools:** Git, GitHub Actions, Apache, cPanel deployments, CI/CD basics, Postman
- ✓ **APIs & Integration:** REST APIs, Swagger, JWT auth, Paystack
- ✓ **Others:** Tailwind CSS, Bootstrap, Postman, Trello, Firebase, Chart.js, Figma/Canva

### Experience

#### FULLSTACK DEVELOPER

Feb – Mar 2026

Fast Food Court (FFC) – *(Restaurant Management Platform)*

[ffc.intellicloud.site](http://ffc.intellicloud.site)

FFC is a restaurant operations management platform designed for multi-branch food businesses. It helps organizations streamline daily operations by providing tools to record sales, monitor inventory levels in real time, and manage staff access across branches. The platform also offers centralized reporting and analytics for improved decision-making and operational efficiency.

#### FULLSTACK DEVELOPER

Jan – Feb 2026

KingsLightHouse Homes – *(Real Estate Investment Platform)*

[kingslighthousehomes.com](http://kingslighthousehomes.com)

KingsLightHouse Homes is a Nigerian real estate platform focused on property investment and management. It enables users to discover, bid on, and secure verified residential and commercial properties through a transparent and competitive bidding system. The platform provides curated property listings, real estate insights, and secure transaction processes to support investors and buyers.

**FULLSTACK DEVELOPER**

Jan – Mar 2026

FDCMCS – *(Cooperative Management Platform)*[fdcmcs.intellicloud.site](https://fdcmcs.intellicloud.site)

FDCMCS is a cooperative management platform built for a member-owned society providing financial and product-based services. The platform digitizes savings contributions, loan management, and bulk product purchases for its members. It supports structured financial tracking, cooperative operations, and access to agricultural and consumer goods within a centralized system.

**FULLSTACK DEVELOPER**

June – Nov 2025

MotoDoc – *(Professional Automotive Service Platform)*[www.motodoc.app](https://www.motodoc.app)

MotoDoc is an automotive service management marketplace connecting car owners with verified mechanics for maintenance, repair, and emergency services. The platform offers vehicle management, service booking, transparent pricing, and keeps maintenance records to simplify auto care for both owners and service providers.

**BACKEND DEVELOPER**

April – Oct 2025

UZEL Fintech – *(Multi-currency & digital finance platform)*[www.uzelpay.com](https://www.uzelpay.com)

UZEL Fintech is a secure financial platform that supports multi-currency wallets, user onboarding with KYC, and two-factor authentication. It offers modern financial services including token-based access, user account protection, and real-time activity tracking.

**FULLSTACK DEVELOPER**

April – June 2025

IRE Community – *(Landowner & Project Management Platform)*[irecomm.com.ng](https://irecomm.com.ng)

IRE Community is a platform designed to streamline real estate ownership, land contribution, and project funding in rural communities. It enables community members to register land, join funded projects, and track financial activities with full administrative control.

**FULLSTACK DEVELOPER**

May – July 2025

SVS – *(School Voting System Platform)*[svs.intellicloud.site](https://svs.intellicloud.site)

SVS is an online voting system used by university associations to conduct transparent, secure, and paperless elections among members. It supports voter registration, candidate nomination, vote casting, real-time result, and ensures only eligible members vote exactly once.

## **FULLSTACK DEVELOPER**

May – June 2025

KPoint Savings – *(Digital Contribution Service)*

[www.kpointsavings.com](http://www.kpointsavings.com)

KPoint Savings is a digital savings and cooperative platform built for users, group reps, and admins to manage contribution plans, digital wallets, and automated savings. The system supports multi-role access and facilitates seamless savings cycles and withdrawals.

## **FULLSTACK DEVELOPER**

December 2024 – March 2025

TribePeer – *(Peer-to-peer learning platform)*

[www.tribepeer.com](http://www.tribepeer.com)

TribePeer is a social learning platform where users can create or join learning tribes. It features a subscription system, messaging between users, and tutor dashboards for content sharing and performance tracking. It encourages collaborative learning and peer engagement.

## **BACKEND DEVELOPER/TUTOR**

January – September 2024

Intellic Solutions – *(Tech Solutions Service Provider)*

[www.intellicsolutions.org](http://www.intellicsolutions.org)

Intellic Solutions is a corporate technology services company offering web applications, mobile solutions, and digital marketing services. The backend system is responsible for handling client requests, managing content and portfolios, user authentication, and secure data interactions in a service-oriented environment.
